Bonnie Marie Anderson

GOES BY Bonnie

DATE OF BIRTH June 19, 2015

PREFERRED HOSPITAL Tri-County General — they hold her record and the allergy flag.

DIAGNOSES

Autism spectrum disorder (age 4). Selective mutism (age 5).
Sensory differences — sound and texture. Mild anxiety (age 8).

ALLERGIES

Amoxicillin — hives. Bee stings — auto-injector in the red pouch.

CURRENT MEDICATIONS

Sertraline

25 mg with breakfast — Anxiety — do not stop abruptly

IN AN EMERGENCY — PROTOCOL

If stung: auto-injector, then 911, then Jessie. If she has bolted, check small enclosed spaces — she hides, she does not run.

HOW THEY COMMUNICATE

Talks freely at home, almost never to a stranger. Carries a laminated card and will use it when speaking is too expensive.

YES / NO

A real yes is a nod plus 'mm-hm' plus half a second of eye contact. A bare nod means 'I heard you and I want this to st...' (see full letter)

SIGNS OF PAIN OR ILLNESS

She does not report pain, she reports the world getting worse: skipping food she likes, a flat hand pressed on the spot, going to bed early unasked.

IF THEY BECOME OVERWHELMED

TRIGGERS

A plan changing without warning, which is most of them. Fire alarms. Being told no with no alternative. Someone touching Forky.

WHAT HELPS

One person talks; everyone else steps back. Lower your voice. Offer the headphones. Say 'You're safe. I'm here. We can wait' — then wait.

AVOID — MAKES IT WORSE

Touching her, crowding, blocking the doorway, rapid questions. Never take Forky away as leverage.

EMERGENCY CONTACTS

CALL FIRST: Jessie — (555) 017-2264. Always her, first, every time.

Jessie Anderson — (Aunt) — (555) 017-2264

Hannah Phillips — (Neighbor) — (555) 017-4417
